

# Biotechnology Regulatory Services

## An Overview

**Carlos Blanco**

# Mission Statement:

We provide leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on sound public policy, the **best available science**, and efficient management.

## Mission Statement:

We provide leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on sound public policy, the **best available science**, and efficient management.

## Vision Statement:

To expand economic opportunity through innovation, helping rural America to thrive; to **promote agriculture production** sustainability that **better nourishes Americans** while also helping feed others throughout the world; and to preserve and conserve our Nation's natural resources through restored forests, improved watersheds, and healthy private working lands.

# Agricultural Biotechnology does that:

(Best) **Science decision-based**

**Agricultural Biotechnology** does that:

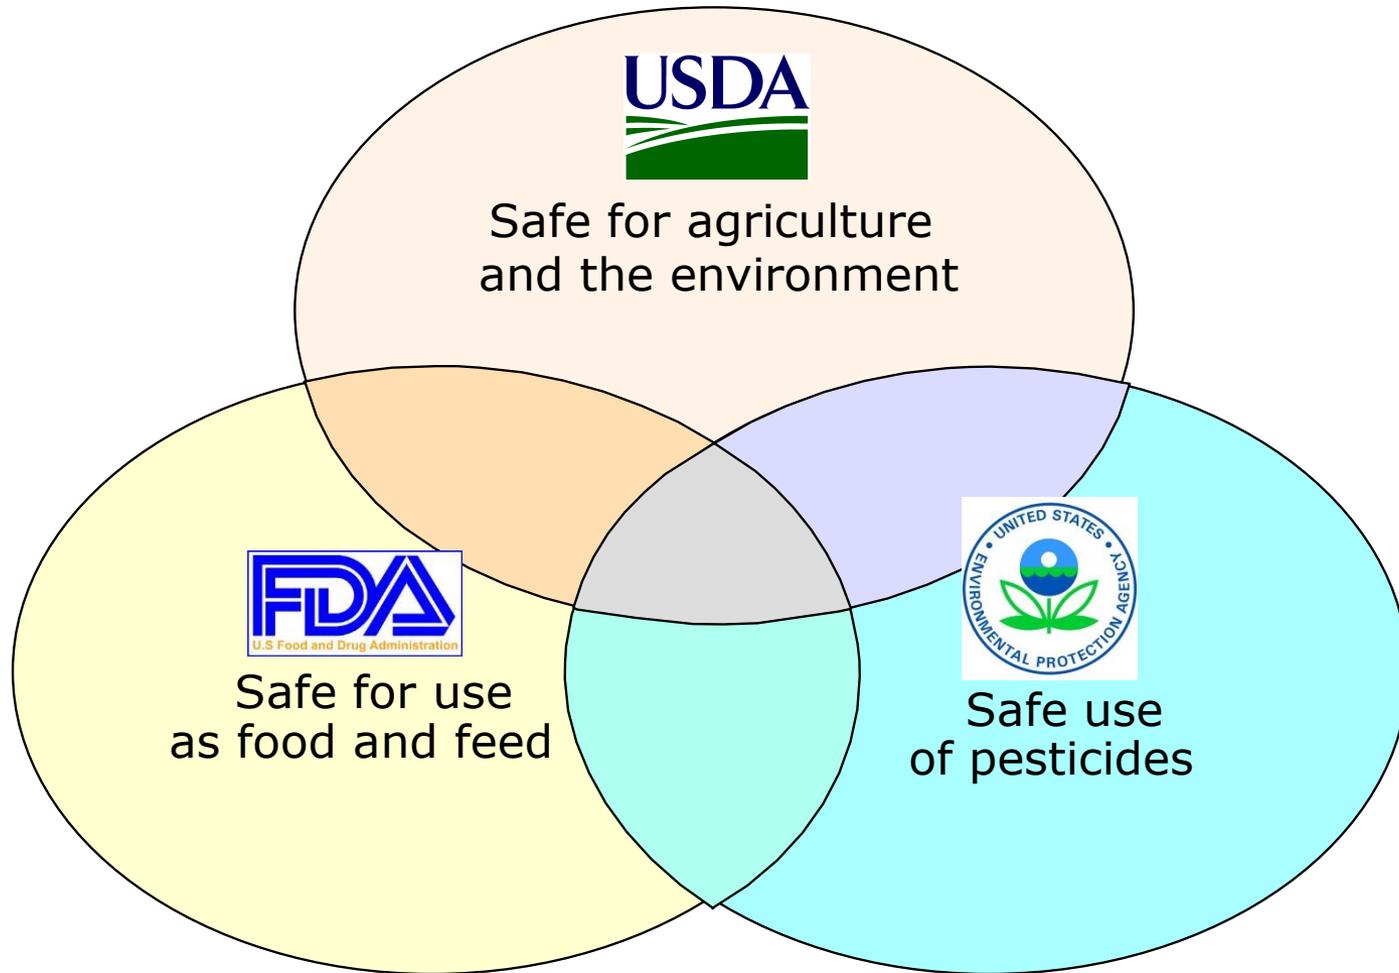

(has increased) **Agricultural Production**

**Agricultural Biotechnology does that:**

**Better nurtures Americans  
and international customers**

# Agricultural Biotechnology is regulated by:

# Agricultural Biotechnology is regulated by:
